

Storyline

You wake up in a hotel room. There are items lying around that you need to escape. First you need to find the notes to get the code to open the bathroom door. Then once inside the bathroom you need to use parts from the lamp to make a wrench to turn the water on beneath the toilet. Once the water is on you can use the extension cord that was previously found, combined with a phone charge to short out the safe causing it to open. With the safe open there is a key inside, it wont open the front door. The key then opens the cupboard above the sink, which has a lockbreaker inside. The lockbreaker then opens the front door and the game is beat.
